

## Subject Index to Volume 51 (2013)

	No.	Page		No.	Page
<b>A</b>					
Absenteeism	5	482–489	Cerebrovascular disease	5	552–558
Accidents	5	530–544	CES-D	4	417–423
Accumulated short-bout exercise	6	563–571	Chemical	1	25–33
Activity restriction	5	501–513	Cleaning solvent	3	319–325
Actual work environment	2	214–222	Climate	4	424–431
Adaptation	5	530–544	Climate change	1	3–15
Adaptive strategies	1	101–112		1	34–46
Aerobic exercise	6	563–571		1	56–67
Agricultural workers	1	47–55		1	68–78
Air sampling	3	237–255		1	86–100
Air sampling bag	3	347–352		1	123–127
Airborne endotoxin exposure	3	237–255	Cohort study	4	452–458
Airline pilot	6	603–611	Company size	5	490–500
Aluminized fire jacket	2	214–222	Control	4	443–451
Analytical methods	3	237–255	Cost of illness	5	524–529
Animal model	6	572–580	Cost-benefit analysis	6	627–633
Asbestos	2	228–231	Costs	6	627–633
Asbestos exposure	1	128–133	Cytokine	3	319–325
Association study	6	612–621	<b>D</b>		
Autonomic nervous system	2	154–164	Decay by time	3	347–352
<b>B</b>			Delphi expert method	3	353–363
Back pain	5	482–489	Delphi method	1	68–78
Bakers	3	275–284	Demand	4	443–451
Baroreflex	4	386–397	Demand control support	2	145–153
Being out of work	5	514–523	Depression	2	165–171
Biochemical alterations	4	373–385		4	417–423
Blood pressure	2	223–227		4	452–458
	4	386–397		5	482–489
Body temperature profile.	1	113–122		5	501–513
Burnout	3	336–346	Depressive symptoms	2	202–213
Burns	3	297–306	Developing countries	1	3–15
Busy workers	6	563–571	Diet consultation	6	603–611
<b>C</b>			Difficulties in occupational health service	3	326–335
CAGE questionnaire	5	490–500	<b>E</b>		
Cardiac output	2	223–227	Educational attainment	5	472–481
Cardiorespiratory endurance	6	563–571	Effort-reward imbalance	2	180–192
Cardiovascular disease	5	552–558	Elderly workers	4	386–397
Cardiovascular disorders	3	256–265	Electroencephalogram	2	223–227
	6	572–580	Employment types	5	490–500
Cardiovascular effects	4	424–431	Enterprise size	3	326–335
Caregivers	4	417–423	Environmental warmth	1	113–122
Ceramic and pottery	1	113–122	Ergonomic tool	6	622–626

	No.	Page		No.	Page
Ergonomics	1	16–24	HOTHAPS	1	101–112
	1	86–100	<b>I</b>		
Exercise intervention	3	336–346	Immune system	2	193–201
Exposure	2	228–231	Impact assessment	3	353–363
Exposure assessment	5	545–551	Index	1	16–24
	6	622–626	Industrial accidents	5	463–471
Exposure modeling	5	545–551		6	581–595
Extended work shift	2	154–164	Injuries	3	297–306
<b>F</b>			Insoluble endotoxins	3	237–255
Family life satisfaction	2	193–201	Instruments	1	79–85
Farm workers	1	47–55	International standards	1	86–100
Farmers	3	275–284	Iron oxide dust	6	596–602
Feedback	4	386–397	ISO 2631-1	3	364–370
Female	2	154–164	ISO 2631-5	3	364–370
Firefighter	2	214–222	Isoflurane	5	545–551
Fixed effects model	5	514–523	<b>J</b>		
Foundry and sheet metal	1	113–122	Japan	3	307–318
<b>G</b>				3	326–335
Gender difference	2	202–213	Japanese workers	4	452–458
GHQ	4	443–451	JCQ	4	443–451
Global health	1	123–127	Job demands	5	472–481
Globally Harmonized System (GHS)	3	353–363	Job demands-resources model	5	472–481
Grainyhead like 2	6	612–621	Job dissatisfaction	3	307–318
Group home	4	417–423	Job resources	5	472–481
<b>H</b>			Job satisfaction	1	134–141
Hand-arm vibration syndrome	4	373–385		2	193–201
Hazard installations	4	432–442	Job strain	2	180–192
Health	1	86–100	Job stress	2	180–192
	2	172–179		3	336–346
	5	530–544	<b>K</b>		
Health risk	3	364–370	Karoshi	5	552–558
Health-behavior	6	603–611	Kitchen work	3	297–306
Heart rate	4	386–397	Knowledge	1	47–55
Heart rate variability	2	154–164	<b>L</b>		
Heat	4	424–431	Labour productivity	1	56–67
Heat exposure	1	56–67	LAL test	3	237–255
Heat strain	3	266–274	Lifestyle-related disease	6	563–571
	4	424–431	Low back pain	3	297–306
Heat stress	1	3–15	LPS marker	3	237–255
	1	25–33	Lung cancer	2	228–231
	1	34–46	Lung neoplasms	1	128–133
	1	47–55	<b>M</b>		
	1	86–100	Macrophage	3	319–325
	1	101–112	Mediator	5	472–481
	3	266–274	Medical cost	5	524–529
heat-related illness	1	47–55	Mental health	5	514–523
Hot working environments	3	275–284		6	627–633

	No.	Page		No.	Page
Mental health problems	3	307–318	Organic solvents	3	347–352
Meta-analysis	1	128–133		6	596–602
Metabolic syndrome	3	256–265	Organizational change	1	134–141
Metabolic syndrome components	3	336–346	Oxidative stress	6	563–571
Meteorological data	1	79–85	<b>P</b>		
Middle-aged workers	2	202–213	Panel data	5	514–523
Model	1	16–24	Panel survey	5	501–513
Molecular epidemiology	6	612–621	Personal protective equipment	2	214–222
Monte Carlo simulation	5	545–551	Petroleum industry	5	530–544
Mould allergy	3	275–284	PHS	3	285–297
Musculoskeletal disorders	6	572–580	PHS model	3	266–274
Musculoskeletal disorders	5	524–529	Physical agents risk assessment	3	285–297
<b>N</b>			Physical examination	6	603–611
Napping	4	406–416	Physical strain	2	214–222
Neuroticism	2	145–153	Physiological heat stress	3	285–297
Night shifts	4	406–416	Population attributable fraction	1	128–133
Night work	2	145–153	Posture	6	622–626
	5	530–544	Predicted heat strain model	3	285–297
Nitrotyrosine	4	373–385	Presenteeism	5	482–489
Noise-induced hearing loss	6	612–621	Prevention programs	6	627–633
Northern industrialized country	1	68–78	Problem drinking	5	490–500
Nurse	2	154–164	Productivity	4	424–431
Nursing	4	406–416	Prognosis	2	165–171
<b>O</b>			Protective clothing	3	266–274
Observational method	6	622–626	Psychoimmunology	2	193–201
Obstructive pulmonary function impairment	6	596–602	Psychological distress	5	472–481
Occupational epidemiology	3	256–265	Psychological morbidity	4	443–451
	5	463–471	Psychological stress	5	501–513
Occupational exposure	1	25–33	Psychosocial factors	2	180–192
	6	596–602	Psychosocial risk factors	3	307–318
Occupational hazards	4	432–442	Psychosocial stress	1	134–141
Occupational health	1	3–15		3	256–265
	1	56–67	Psychosocial work characteristics	4	398–405
Occupational health and safety	1	68–78	<b>Q</b>		
Occupational health and safety management system	5	463–471	Questionnaire	2	214–222
	6	581–595	Questionnaires	4	432–442
Occupational health psychology	2	193–201	<b>R</b>		
Occupational health service	3	326–335	Real-time PCR	3	319–325
Occupational injury	1	34–46	Recurrent sickness absence	2	165–171
Occupational low back pain	5	524–529	Research priorities	1	68–78
Occupational physician	3	326–335	Resonance frequency	4	373–385
Occupational safety and health	4	432–442	Restructuring	1	134–141
Occupational types	5	490–500	Retention rate	3	347–352
Offshore	5	530–544	Return to work (RTW)	2	165–171
Operation room	5	545–551	Rising temperature	1	101–112
			Risk factor	4	452–458
			Risk management	6	581–595

	No.	Page		No.	Page
Risk matrix	1	25–33	<b>V</b>		
ROC curve	5	552–558	Vacuoles	4	373–385
<b>S</b>			Vibration	6	572–580
Safety and health issues	4	432–442	Vibration exposure	3	364–370
Sedentary Japanese workers	6	563–571	Vibration level	3	364–370
Self-assessed health	5	514–523	Vigilance	4	406–416
Self-efficacy	4	452–458	<b>W</b>		
Self-reported health	5	501–513	WBGT	1	79–85
Sensorineural disorders	6	572–580		1	113–122
Serum cholesterol	6	603–611		1	123–127
Shift work	2	154–164	Wearer mobility	2	214–222
	2	172–179	Welding fumes	6	596–602
	5	530–544	Well-being	1	134–141
Shift work home interference	2	145–153	Wet bulb globe temperature	1	79–85
Shift-work locus of control	2	145–153	WHOQOL-BREF	4	443–451
Sick leave	4	398–405	Work	4	424–431
Sickness absence	2	165–171	Work ability	1	134–141
Single nucleotide polymorphism	6	612–621	Work capacity	1	56–67
Single-item	2	193–201	Work condition	2	193–201
Sleep	2	172–179	Work environment	3	297–306
sleep	5	530–544		3	336–346
Sleep quality	4	406–416		4	417–423
Small-medium enterprises	5	463–471	Work environments	1	123–127
Social cost	5	524–529		3	256–265
Social inequity	5	472–481		5	463–471
Socioeconomic status	5	472–481		5	501–513
Standards	1	16–24	Work environments	6	581–595
Stone quarry workers	1	113–122	Work hours	6	581–595
Structural damage	4	373–385	Work stress	4	406–416
Suicidal ideation	2	202–213	Worker	2	193–201
Supervisor support	4	398–405	Workers	1	34–46
<b>T</b>				5	482–489
Talc	2	228–231	Workers' compensation	5	552–558
Tetrachloroethylene (Perchloroethylene, PCE)	3	319–325	Working environments	1	101–112
Thai Cohort Study	1	34–46	Working hours	5	552–558
The JACS study	3	307–318	Working memory	4	386–397
Thermal Stress	1	16–24	Workplace	5	490–500
Thermal stress	1	123–127	Workplaces	6	627–633
Thermophysiological response	3	266–274	Work-related disease	5	524–529
Time allocation	3	326–335	Work-related musculoskeletal disorders	2	180–192
Total peripheral resistance	2	223–227		6	622–626
<b>U</b>			Work-related symptoms	3	275–284
Unemployment	5	514–523	Work-rest schedule	2	223–227
